

CHILDREN OF CHINA PEDIATRICS FOUNDATION

OUR MISSION

The mission of Children of China Pediatrics Foundation is to provide direct medical treatment for disabled children in China's orphanages. As a not-for-profit, non-partisan organization, we send teams of pediatric surgeons from the United States to China to perform surgeries on orphans to correct disfiguring birth defects and disabilities.

THE CHILDREN IN CHINA'S ORPHANAGES

Today, there are hundreds of thousands of children living in orphanages throughout China. While even the healthiest of orphaned children face tremendous obstacles, the future for those with disabilities is far more bleak. Although, their conditions are often correctable, these children are unlikely to ever receive surgery in a country with limited resources. Most will never be adopted, and some do not survive at all.

SURGICAL MISSIONS

The Foundation's medical teams have performed over 200 surgeries and medical procedures on orphaned children from Anwei, Jiangsu, Hunan, Zhejiang, Henan and Heilongjiang provinces. We perform orthopedic, plastic, urological and general pediatric surgeries to correct conditions such as spina bifida, polio, cerebral palsy, tuberculosis of the spine, cleft lip and palate, eye strabismus, webbed hands and club foot. The children we operate on range in age from infants to adolescents.

TANGIBLE RESULTS

In just an hour or two, a doctor can change the life of a child forever. Almost immediately, we can see how a life has been transformed. Because we provide on-site medical services, your donation goes directly for the care and treatment of children with disabilities.

OTHER MEDICAL PROGRAMS

The Foundation also provides additional medical services to help with the care of disabled orphans in China:

- Gift Surgeries—we bring children to hospitals in the United States to correct conditions that require extremely complex medical procedures
- Sponsored Surgeries—we provide the funds to local Chinese hospitals for surgical procedures for children from orphanages throughout China
- Medical Equipment—we underwrite the cost of much needed medical equipment in Chinese orphanage hospitals, such as anesthesia machines and monitoring equipment
- Visiting Scholar Program—we provide scholarships for Chinese surgeons from orphanage hospitals to come to the United States to study and learn new techniques.

SUPPORTERS OF THE FOUNDATION

Architect I.M. Pei, Ambassador L. Paul Bremer III and real estate developer Gerald Hines serve on the Honorary Executive Committee. The Board of Directors includes parents, physicians, educators and other professionals.

We are an entirely volunteer organization that relies on the generosity of its donors. All medical services are donated, as are virtually all medical equipment and supplies. Contributions are applied to costs not covered by donated goods or services.
